

DECEMBER 8TH SUPPORTING SULLY

On Sunday October 6th, 2013 the North Palos Fire Protection District responded to a house fire in Palos Fire Protection District. The fire resulted with firefighter Michael "Sully" Sullivan being trapped under approximately 5300 pounds of the plaster/cement ceiling. Sully had to make that call that every firefighter dreads to hear much less having to make...a **MAYDAY** call. He was unable to move. It took crews several minutes to extricate him. Michael "Sully" Sullivan suffered injury to both knees and a shoulder injury, all requiring surgery. **Michael "Sully" Sullivan** has been a dedicated member of the North Palos Fire Protection District for the past 17 years were he has proudly served. Michael is a great friend and coworker to everyone that he has worked with. He is always helping us anytime we need him both professionally and personally. **Now he needs our help!**
